Education

Degree/Certificate	Institute/Board	CGPA/Percentage	Year
B.Tech. (CSE)	Rajiv Gandhi Institute of Petroleum Technology	6.24	2022-2026
Senior Secondary	State Board	9.8	2022
Secondary	State Board	92.6%	2020

Projects

• AJIO Deceptive Design Audit: Uncovered Dark Patterns in E-commerce Checkout

Aug 2026

Redesigning transparency back into AJIO's checkout flow

[Project Link](#)

- **Problem:** Audited AJIO's checkout and onboarding flow and found three dark patterns: a hidden GST invoice option, a low-visibility skip button, and a misleading "free gift" promotion.
- **Process:** Classified each pattern against standard UX dark-pattern taxonomy (Sneaking, Aesthetic Manipulation, Bait-and-Switch) and designed targeted fixes in Figma.
- **Results:** Surfaced the GST invoice above the fold, equalized visual weight between the CTA and skip button, and replaced "free gift" copy with accurate discount framing.
- **Impact:** Improved transparency and user trust while preserving core business goals like sign-up conversion and discount promotion.

• Gas Booking App: For Elderly & Low-Literacy Users

Aug 2026

Booked in three taps: rethinking gas cylinder booking for users who struggle with apps

[Project Link](#)

- **Problem:** Identified accessibility gaps in gas cylinder booking apps that excluded elderly and low-literacy users through complex, text-heavy flows.
- **Process:** Validated a simplified flow with a low-fidelity wireframe, then built a high-fidelity prototype in Figma.
- **Results:** Designed a streamlined flow with large touch targets, icon-and-text labeling, and clear confirmation states to reduce error and drop-off.
- **Impact:** Improved independent usability for elderly and low-literacy users, reducing their dependency on others.

• Ecole Globale UX Report: Usability Audit for a Boarding School Admissions Site

Sept 2026

Auditing navigation, popups, and conversion flow for a premier boarding school's admissions site

[Project Link](#)

- **Problem:** Audited Ecole Globale's admissions site and found three issues: a jarring Enquire Now popup, a search-less nav bar burying 30+ sub-items, and a hidden campus-tour booking feature.
- **Process:** Mapped real user click paths against each user goal and designed wireframe fixes for each issue in Figma.
- **Results:** Softened the popup styling, replaced the nav with a mega-dropdown menu plus search, and relocated campus-tour booking into the main navigation.
- **Impact:** Reduced click depth to key conversion actions and improved discoverability of the site's most distinctive features.

Technical Skills

- **Image Editing:** Figma, Canva
- **Web Skills:** HTML, CSS, JavaScript
- **AI:** Image Generation, Video Generation, Prompt Engineering
- **Video Editing:** Adobe Premiere Pro, CapCut, Blender, Unity
